Intake Manifolds

SSX Sheetmetal Upper Intake Manifold
99-up Ford 3.8 V6 Mustang/4.3 Stokers
Dyno Proven to over 550 Horsepower!

This is THE upper intake for the split-port Mustang, nothing else comes close. Unique modular design with tuneable upper intake runner length from 1.5 to 3 inches via the use of machined spacers. Includes the plenum, aluminum alloy spacers, gaskets, bolts, vacuum fittings, throttle cable and coilpak attachment brackets. Ideal for high power supercharged 3.8's and our 4.3's. This is **the** intake for forced induction and wet nitrous systems since it improves distribution in the stock upper design. Requires use of 96-04 GT external IAC: **\$1150**

SSX Options:
BBK 65mm throttle body: **\$240**

99-up 3.8 V6 Mustang 97-up 4.2 V6 F-150
