Key fob, Free
\$8 shipping and handling

Split-Port Miscellaneous Parts Swap Kits

You already have split-port heads and intakes. But what about all the other parts you must have for the split-port swap on your earlier single port engine? We have you covered with our miscellaneous swap parts kit, includes: throttle body, throttle cable, IAC, coil pak, plug wires, front and rear metal coolant bypass tubes, EGR lines and solenoid, **specially modified split-port swap fuel rail**, injectors, PCV and vacuum lines, intake manifold bolts, thermostat housing, etc: **\$350**

Air Conditioning Delete Kit: \$90

Remove that heavy and power-robbing air conditioning compressor, dryer, etc. Our A/C Delete kit is a simple bolt-on bracket and pulley that replaces the compressor, this way you can still use the stock serpentine belt!

Used Engine Parts

We have many used engine take-off parts available, headers, timing covers, stock rods, pistons, and cranks, oil pans, cam position sensors, IAC's, etc: **Call**
